

June Update

- Any golf courses looking for info regarding Audubon Education and Certification are encouraged to go to <https://auduboninternational.org/acsp-for-golf/>
- The Manitoba Government Agriculture Website has some great weather information available for use by turf professionals. Simply find the weather station closest to your location to access historical data, as well as real time weather parameters including soil moisture, soil temperature, relative humidity, etc.: <https://www.gov.mb.ca/agriculture/weather/index.html>
- The Pest Management Regulatory Agency provides an online tool for Superintendents to search for label information of common products used on golf courses: <https://pr-rp.hc-sc.gc.ca/ls-re/index-eng.php>
