

Environmental Updates

Environment Committee Chair - Jordan Joye

- The MGSA is once again excited to support the Alberta Turfgrass Research Foundation (ATRF) for another year. MGSA members will benefit from discounted disease diagnosis services, consulting discounts, quarterly updates, and complimentary industry lectures and CEU presentations. Membership also includes access to past and current research from both Canadian Turf Research Foundation and Alberta Turfgrass Research Foundation; a collective database which spans hundreds of projects, providing a deep understanding of the sciences in our field, and the solutions for our Canadian Turf Managers. For more info, please visit the link here:
- [Olds College Centre for Innovation \(OCCI\)](#)
- The Pest Management Regulatory Agency provides an online tool for Superintendents to search for label information of common products used on golf courses:
- [Pesticide Label Search - Health Canada](#)
- The Nutrient Management Regulation requires that golf courses and driving ranges submit their Nutrient Management Plan for the 2026 season at least 14 days prior to fertilizer application. The template as well as additional instructions to assist you when completing your Nutrient Management Plan are available at the following address:
- [Environment and Climate Change | Province of Manitoba](#)

Golf courses are scheduled for permit renewal this year. Remember to send your applicators license number to all of your chemical suppliers.
