LIFTING EQUIPMENT

DIESEL PROCESSING UNIT (DPF TPW)

OTC 5281

18,249⁰⁰

- Pre-programmed thermal profile controls temperature 'ramp up' and 'cool down' to protect DPF from thermal shock, reducing the risk of DPF cracking.
- Holds temperature constant for two hours to ensure complete regeneration of filter.
- Built-in safety door lock and electronic door switch prevent unauthorized opening of the door when temperatures exceed 200 degrees F.
- Large chamber accommodates various DPF sizes and shapes. Front access door allows for easy access to the thermal chamber.
- Includes both standard cycle and "pre heat" cycle for oil-soaked filters.
- Internal chamber dimension: 24" (L) x 24" (W) x 26" (H).

PORTABLE DPF CLEANER

OTC 5286

NAPA LEASING

20,949⁰⁰

\$423.00 per month*

- Flexibility - clean DPFs from 6" to 15.5" in diameter using shop or compressed air of at least 100 PSI and 20 CFM sustained airflow.
- Fully Automated Operation - once started, the cleaning process can be completed with minimal operator oversight, freeing up the technician to simultaneously do other work in the shop.
- Focused Air Jet Technology™ - concentrates a precise high-pressure stream of air directly into every cell.

PROVEN TO KEEP YOUR FLEET ON THE ROAD LONGER

We understand that the needs of emergency service, municipal and commercial fleets are unique. So we developed NAPA Fleet brake pads and brake rotors with the needs of your whole team in mind—technicians, buyers and drivers. Our brake pads and rotors are engineered to handle extreme braking conditions while providing extended service intervals and surpassing the expectations of your whole hardworking team.

DISC BRAKE PADS

Fleet formulations provide extra-long life, supreme thermal conductivity and performance in high heat situations.

Extended life

Highest quality formulas engineered for maximum pad life.

Consistent performance

- Consistent pedal feel and performance in the most extreme conditions
- Suitable for towing or heavy loads
- Police applications pursuit rated

Quiet formulations

Noise dampening characteristics that meet or exceed OE with specialty chamfers, slots and shims.

BRAKE ROTORS

Fleet rotors are engineered with a special high-mass metallurgy that adds tensile strength, dissipates heat quickly and enables the rotor to mate/ be tuned to the friction.

Perfectly balanced rotors for demanding situations

Technologically advanced casting, cold box molding process, ensures tighter tolerances with minimal machining and balancing required.

Industry leading pad-to-rotor bedding

Patented concentric groove finish provides industry leading friction effectiveness, right out of the box.

Excellent stability, heat dissipation and noise-free operation

- Carbon+ formulation optimizes heat transfer for cooler braking
- Carbon+ formulation enhances structural composition to resist cracking and distortion
- Carbon+ formulation natural damping provides quiet operation
- OE coolingvane configuration

MATCHED PADS AND ROTORS. BEST POSSIBLE PERFORMANCE.
